

Dear Parim and Nimay,

Congrats on winning StudentCam's grand prize!

I'm not at all surprised. Your questions were well-researched and thorough. You did a great job putting this together and making your case that the US needs better data privacy laws, the damage that has been done because we still don't have them, and what Congress can and should do. The video is well-edited and looks professional, too.

I'm honored I was a small part of it. Thanks for reaching out to me and letting me ramble on, and then doing a great job of making me sound smart.

– Sara Morrison
